Canon FAX PHONE L170 Fax Driver Mirror. Standard Chart No.1, (Standard Mode) at. Using the Machine With the Printer Driver. We deal directly with the manufacturers of Canon professional equipment. Because of their specialized knowledge, they can give you more detailed information and advice. Novel insight into atypical hemolytic uremic syndrome - proposed inclusion in the Chinese classification of 2005. The presence of anti-neutrophil cytoplasmic antibody (ANCA) is one of the defining features in a group of uncommon diseases now defined by the term atypical hemolytic uremic syndrome. The classification system followed by European authorities is based on renal and extrarenal manifestations. Here, we review the classification criteria of atypical hemolytic uremic syndrome (aHUS) according to the Chinese classification. The diagnosis of aHUS is based on clinical presentations and laboratory tests. The classification criteria of aHUS are listed. Our findings show that the classification criteria of aHUS are different from those used by European experts. It is worth exploring further whether a single classification system can be developed to cover the wide spectrum of disorders resulting from overactivation of the complement system.

1. Field of the Invention
This invention relates to a method and apparatus for protecting polymerase chain reaction (PCR) tubes, which are exposed to intense heat, from improper handling. More particularly, the invention is related to a method and apparatus for rapidly sealing a PCR tube after opening the tube containing a biological sample (e.g., blood, tissue, or the like).

2. Description of Related Art
The following art defines the present state of this field: Wood et al., U.S. Pat. No. 5,776,898, teaches a PCR tube and a method for producing the PCR tube. Preferably, the PCR tube is a two-part tube comprised of a screw-top part and a luer lock part. Wood, U.S. Pat. No. 5,575, 570a42141b
